in islamic contributions to civilization scholar and philosopher stanwood cobb restores to history the immense and often overlooked legacy of islamic culture in shaping the modern world first published in 1912 this illuminating study traces the far reaching influence of islamic science philosophy art and ethics on the rise of european civilization with eloquence and balance cobb demonstrates how the intellectual spirit of islam grounded in inquiry tolerance and reverence for knowledge bridged the ancient and modern worlds during the so called dark ages of the west from the preservation and advancement of greek philosophy to pioneering discoveries in mathematics medicine astronomy and architecture cobb reveals the dazzling scope of islamic achievement yet beyond cataloguing innovation he emphasizes a deeper truth that the civilization of islam represented a synthesis of faith and reason uniting spiritual aspiration with empirical curiosity his analysis challenges stereotypes and calls for a renewed appreciation of the cultural dialogue that has long linked east and west more than a historical survey islamic contributions to civilization is a meditation on the universality of human progress cobb s prose radiates respect and admiration for a civilization that transformed learning preserved beauty and offered humanity a vision of harmony between the material and the divine over a century later his message of intellectual kinship and cross cultural understanding remains as relevant as ever

gives an overview of arabia as the crucible of islam its language and history religion and culture and the essence of islamic civilization also discussed are the qur an the sunnah institutions the arts the sciences the law and the spreading of islam final chapters include theology and mysticism hellenistic philosophy the natural order the art of letters calligraphy ornamentation in the islamic arts the spatial arts and the art of sound

studies in islamic civilization draws upon the works of western scholars to make the case that without the tremendous contribution of the

muslim world there would have been no renaissance in europe for almost a thousand years islam was arguably one of the leading civilizations of the world spanning a geographic area greater than any other it eliminated social distinctions between classes and races made clear that people should enjoy the bounties of the earth provided they did not ignore morals and ethics and rescued knowledge that would have been lost if not forever then at least for centuries the genius of its scholars triggered the intellectual tradition of europe and for over seven hundred years its language arabic was the international language of science strange then that its legacy lies largely ignored and buried in time in the words of aldous huxley great is truth but still greater from a practical point of view is silence about truth by simply not mentioning certain subjects propagandists have influenced opinion much more effectively than they could have by the most eloquent denunciations studies in islamic civilization is a compelling attempt to redress this wrong and restore the historical truths of a golden age that ushered in the islamic renaissance and as a by product that of the west in doing so it gives a bird s eye view of the achievements of a culture that at its height was considered the model of human progress and development
